OFFERING UNMATCHED EXPERIENCE
MESSAGE FROM THE CEO

DMITRIY KORSHUNOV

WELCOME TO DELTA WORLD CHARTER

Delta World Charter have worked in many of the most demanding and secure environments in the world. Our global reach means that we can support our clients wherever their needs require. Our team have over 95 years of combined aviation expertise to draw upon the accumulated knowledge of an organization that has set new standards of excellence in aviation. We have earned the trust and respect of our customers for one simple reason: we have great people. They are experts in their fields. They bring a strong service ethos to everything they do. They take pride and ownership in the jobs they do. We bring passion, pride and experience together.
Founded in 2014 and headquartered in Dubai, Delta World Charter is an aviation brokerage company that provides tailored solutions for charter of Private Jets, Commercial Airliners and Freighters, globally. In 2016, the company expanded its wings and opened their first overseas office in Moscow.

WHY CHOOSE US?

- Global access to over 60,000 aircraft worldwide
- Over 1300 charter flights as of 2018 with total revenue of $60M
- Offices in Dubai and Moscow
- We speak 15 languages
- Over 95 years of combined industry expertise
- Dedicated account manager for every customer
- Available 24/7/365
- State-of-the-art technology to find available aircraft within half an hour
- Hundreds of satisfied customers
Delta World Charter has global access to 60,000 aircraft worldwide which enable us to offer the best solution to your charter requirements. From light business jets, best for short-range trips, to heavy jets for travel up to approximately 12 hours of flight time. Because we partner with aircraft operators across the globe, the options are limitless.

**CASE STUDIES: Working around tight schedules**

**Background:** A multinational company approached us with an itinerary of multiple cities for their business expansion that would require an on-demand charter schedule. They requested for a cost analysis and assistance in determining the best travel solution. DWC had 1 month to submit the proposal.

**Solution:** DWC evaluated their planned flight patterns and started looking for the suitable aircraft for the project. The team shortlisted 2 of the best aircraft, fit for the project. One of them was the Lineage 1000. After extensive negotiations with the operator, DWC managed to secure a contract based on hourly utilization with Al Jaber Aviation. The client was pleased with the offer as they only had to pay for actual flights flown. The project ran for 2 and a half months. Over this period, DWC managed the aircraft and successfully achieved the longest flight ever for Lineage 1000. The aircraft flew in a record time of, 10 hours and 4 minutes from Beijing China to Al Bateen Executive airport; completed 214 hours in the air; flown 148,720 kms distance; 41 arrivals in 29 unique airports, covering 22 countries. The aircraft crossed 4 times over the Atlantic Ocean and 5 times over the Indian Ocean. Time is money. Flying Private means, you can save precious time from security checks, to on time departure. Not to mention, flexibility, high level security, luxury and convenience.
Air Ambulance is an extremely crucial service that can turn out to be the lifeline of a patient. DWC is a trusted partner for such needs and offers instant emergency flights with specialized medicare, advanced vital life support systems and medical staff from anywhere to anywhere.

CASE STUDY: When Time is of the Essence

Background: A tourist had a heart attack while on a holiday in the UAE. The doctors at the local hospital advised that the patient needed to undergo heart surgery. The family decided that it was best to fly the patient back to the UK to carry out the procedure.

Solution: The luxurious 5-star hotel where the patient was holidaying contacted DWC. It is vital that we know where to get the right aircraft with life support equipment and a medical team to look after the patient during the flight due to his critical condition. Our team arranged an aircraft and a medical team to receive the patient from the hospital within 3 hours of the request. While waiting for the clearance from the hospital, our team arranged an ambulance to take the patient from the hospital direct to the aircraft. Our team updated the family of the patient back in the UK with live update of the flight and situation. Whilst airborne, our team had already arranged an ambulance in the UK to receive the patient direct from the airside to the hospital. Our client had a successful surgery and had recovered following the incident.
Helicopter charters are an impressive, easy and convenient way to travel to corporate events, business meetings, vacations, weddings or other events. These are especially suited for travel to remote, congested or otherwise difficult to reach destinations on account of their flexibility vs. fixed-wing aircraft. DWC offers a wide range of helicopter charters with the highest standards of safety and reliability, from any location to your preferred destination.

CASE STUDY: Creating Memorable Experiences

Background: Our client wanted to surprise his girlfriend on their anniversary day. He planned to propose to her during dinner in Baniyas island.

Solution: It was not just a celebration of their anniversary. Little did she know that there was more to it than just a helicopter ride. When the client came to us with the idea, DWC thought it would be more memorable if he proposed during their flight. The team helped him execute the proposal in the most unconventional way. Our charter specialists worked with the ground handlers to ensure the surprise goes as planned. The mood was set, and it was time to land. She looked over the window and saw a message on the island saying, “will you marry me?” She said Yes! Needless to say, this was one of our memorable helicopter flights.
Travelling with an intimate group of passengers versus the commercial flight ensures that you enjoy a bespoke journey. Whether you choose to fly around the world or immerse yourself in a specific region, every detail is curated just the way you want them. From a small group of 19 to 500 delegates attending an event, we are sure to make your journey memorable.

**CASE STUDY: Incentive Tour with Multi-leg trip**

**Background:** Multi-leg trips require a lot of planning and coordination, from beginning until the end of the trip. When DWC team received the request from a large financial organization to transport 300 passengers to 3 Countries over a period of 4 days, they knew they had to find the right aircraft that would meet the requirements of the client.

**Solution:** Our team worked tirelessly for days, coordinating with multiple ground handlers for securing slots and permits to ensure flights run smoothly. An Airbus A330 was the perfect choice for this group size. DWC staff were on call during the 4-day period. With specialized and custom catering, the flight was a huge success. Our client was so impressed with the way our team organized the charter flights in a short amount of time.
Delta World Charter can arrange convenient charters to holy places to which you wish to travel. We understand that pilgrimage travelers have specific requirements—dietary, nutritional, hygienic and religious, and the usual schedules flights may not meet all of these. Save transit times and eliminate complications with direct flights that land as close as possible to the destination.

CASE STUDY: Securing Landing Permits and Slots

**Background:** A Royal family from UAE wanted to fly with a group of friends to perform Umrah over the weekend. The request came on a Thursday afternoon. Last working day of the week in the Middle East. Flying into Saudi Arabia requires planning and strict compliance to the rules.

**Solution:** Our team knew securing permits and slots would be a challenge. This did not stop them from delivering a solution. They started working with the operator in order to secure the landing permits and slots. Once the permit was ready, the flight was scheduled, performed and another happy client added to our list.
From evacuations during natural calamities; to facilitating quick turnaround of flights for NGO's delivering humanitarian aid. DWC provides charter solutions for crisis management. With our extensive network of aircraft globally, we can quickly arrange charters for:

> Search and rescue (SAR) teams
> Corporate evacuation
> Repatriation for medical emergencies
> Refugees

**CASE STUDY: Short notice airlift**

**Background:** Our client wanted a quick solution for their teams that were based in red zone countries. They knew that the risks are high if an attack were to happen and needed a contingency plan.

**Solutions:** DWC created an evacuation plan and offered an Emergency Response Plan (ERP) that would enable the team to evacuate within 12 hours in case of a disaster. This solution was well received by the client to which they have signed a one-year contract.
Sports teams are turning to private charters with teams often travelling on tight schedules. Chartering an aircraft means that managers control suitable departure times to fit in with their team’s schedule and allow maximum rest and recovery time for the players. On board catering can also be ordered to accommodate the players’ special diets.

**CASE STUDIES: Custom Branded Aircraft and Bespoke Catering**

**Background:** Football is one of the favorite sports’ entertainment in the world. It truly is an international sport, with players attending matches and events all over the world. With their tight schedule for trainings and matches, the football club in Africa contacted us to arrange a charter for their team within 48 hours of their friendly match in Saudi Arabia.

**Solutions:** Within hours of the request, our charter specialist provided a solution with an aircraft; bespoke catering and on time departure following the schedule of the team.

**Background:** Another friendly match was set. This time it was in Pakistan. Our client didn’t just want a private jet. He wanted custom branded headrests. For less than 20 seats and no time to spare, we need to find a supplier who can deliver such request.

**Solution:** Our team pulled out all the strings in order to produce the custom branded headrests in time for the flight. The passenger was none other than celebrity football player Ronaldinho. We received compliments from the client for being able to produce branding and bespoke catering fit for a king.
Those who have been involved in transporting heavy and oversized cargo know that it is extremely complex, challenging and tedious. It is influenced by various factors such as the type of cargo and its volume, the aircraft chosen, the timing of the airlift, airports involved, facilities required, trip length and the legal structure and support to name a few.

**CASE STUDY: Multimodal Transport**

**Background:** When an oil and gas client approached us with an urgent requirement to pick up a catalyst for primary reactor to help them make their faulty oil rig operational again, we knew we had to act fast to make sure the parts reach their intended destination as soon as possible.

**Solution:** An offshore oil rig was inoperable due to multiple problems. To resolve the situation, a vital equipment, particularly a catalyst for primary reactors had to be transported to its location in a short amount of time. Our team sourced a Boeing 777 freighter due to its ability to load the size and weight of the cargo. The catalyst was still in the warehouse in Charles de Gaulle, so our charter team arranged 4 trucks to pick up the reactors from the warehouse and directly loaded them to the aircraft. Upon landing at the destination, the team arranged pre-customs clearances and permits for express pick up, including airside truck access for the consignee which is a critical aspect for on time delivery. The reactors have reached its destination, saving significant costs for our client.
When disasters and calamities strike, charter flights are the only effective option to deliver support to the disaster-stricken area. But such a catastrophe is usually followed by other invading problems such as air traffic administration issues, ground handling facilities and finding the most suitable cargo aircraft that is available at the time. Delta World Charter delivered hundreds of tons of medical relief, food and life support in the past years across the world.

CASE STUDIES: Saving Lives in Times of Calamities

Background: A natural disaster or political conflict, can cause loss of life or damage property, and typically leaves some economic damage in its wake, the severity of which depends on the affected population's ability to recover and on the infrastructure available. When such calamities strike, DWC works with various NGO’s to aid the victims thru delivering humanitarian aid at a day’s notice. We received several projects to deliver humanitarian aid. Here’s what our team did.

Solution: Upon receiving the requests, our team contacts our preferred partners for the availability of the aircraft based on the distance and types of goods we were to carry. All these projects were delivered within 48 hours of the request. In 2017, together with United Nations mission, we delivered over 66 tons of high energy biscuits and medicines to the distressed shelters of Somalia using a B727-200 aircraft. In 2018, over 100 tons of aid relief were transported from Dubai to Angola on an IL76 aircraft that helped more than 11,000 people fleeing Congo due to political conflict. Also in 2018, DWC delivered over 300 metric tons of aid over 5 flights for HM Mohammed VI of Morocco to East Africa using an IL76 aircraft.
Managing and executing an airlift for the Oil & Gas industry can be a very cumbersome and risky process because of the threats involved. Any charter company that undertakes an oil and gas transport needs to have specialists who are well versed with the process from A to Z and experienced and certified in arranging such air freights.

DWC cargo team has extensive technical expertise, access to worldwide network of aircraft and people involved to aid in speeding up the process. When you hire DWC to arrange an oil & gas charter, you hire a company, its brain and its heart to work with you.

CASE STUDY: Time Critical Solutions

**Background:** There are only a limited number of aircraft that can carry outsized equipment. So, when our client reached out to us with a requirement to move 3 x 8.6-meter-long drill bits, our charter specialist knew what aircraft to offer.

**Solution:** As soon as the offer was accepted by the client, our team started working on the permits required for the charter. The client had very stringent schedule and required the drill bits delivered to its destination within 48 hours. Our team worked tirelessly, coordinating with the ground handlers to secure the permits on time. The flight went as scheduled.
The safe transport of dangerous goods, that is those with hazardous properties, involves stringent handling procedures, abiding with legal norms of the countries involved and adhering to the correct handling procedures. By virtue of our strong global partnerships with aircraft, on-the-ground operators and other related people and corporates; we offer a one-stop unmatched solution for airlifting your dangerous goods. We understand your apprehensions and challenges and are proud to offer outstanding support to our customers.

CASE STUDY: Dedicated Transport Solutions

**Background:** We were approached by our client with a requirement to move a Class 3 – DG flammable liquid from Germany to Australia.

**Solution:** A Boeing 747 aircraft was provided to the client, following technical instructions for the safe transport of Dangerous Goods by Air. We have successfully delivered 60 tons of the flammable liquids within days of the set timeframe.
The transportation of valuable goods present many unique challenges to the shipper and logistics provider. There are many touchpoints along the supply chain and each of these points is a high-risk opportunity for loss to occur. Our charter specialists take extensive steps to prepare for the potential risks which can occur at any point in the supply chain. Ensuring our customers’ products arrive safely.

CASE STUDY: Customs Clearance

Background: A famous broadway musical was on a tour in the Middle East when their logistics team approached us with a mission. To deliver the stage and concert equipment to their next show. As soon as the final show wrapped up, we had 72 hours to deliver cargo to the next destination.

Solution: Our team started sourcing for the aircraft that could take in odd-sized stage equipment. A Boeing 777 aircraft was provided, carrying over 65 tons of equipment from the show. Our team monitored the movement of the equipment from the Convention Centre to the airport. It required strategic planning as there was no room for error nor delay. We went above and beyond the call of duty and arranged pre-customs clearance ahead of landing to the destination which helped save a lot of time. The stage was set, and the show was spectacular as expected.
We provide efficient governmental and military air charter solutions to our clients. Government and defence flight operations are some of the most complex and challenging that need meticulous planning. Our team of experts can help you. We have assisted with the travel arrangements of high profile government ministers, head of states, the evacuation of civilians, humanitarian missions, search and rescue operations, troop movements and the transportation of military supplies and equipment.

CASE STUDIES: Specialised Freight Services

**Background:** We received a call from a supply chain management company that wanted to deliver an armored vehicle in time for the International Defence Exhibition and Conference (IDEX) in Abu Dhabi. It was crucial that the 26-ton vehicle arrive at the exhibition on time as it was to be showcased at the event. We had 72 hours to find a solution.

**Solutions:** With our extensive network and expertise, our team was able to find the suitable aircraft within a days’ notice. With impeccable timing and working within the stringent security controls on the apron, unloading the Boeing-747 charter plane went smoothly and DWC was able to transport the high valued vehicle from the airport to the IDEX Convention Centre in Abu Dhabi with no delays.
Delta World Charter only partner with the qualified operators that uphold rigorous standards for safety, maintenance, training and operations in the Industry and have all the necessary licenses and permits to conduct commercial transportation. We offer aircraft that have passed safety standards of the state of the operator. All of our organized flights will depart after the “check list is marked”.
